

A New Lens for Local History

Cedar Falls Historical Society

The team led by Bluewater Studio has been selected to Plan, Design, Fabricate and Install exhibits for a newly built facility. These exciting, STEM-driven interactive exhibits will interpret the history of industry, agriculture and transportation in Cedar Falls, Iowa, for all ages. This is the story of people, technology and innovation in the development of Cedar Falls.

"We were impressed by how carefully they listened to us - to our concerns, our dreams, and our fears... They shared even complex design concepts in a way that sparked our own creativity and allowed us to feel fully a part of the process."
