

Hollywood Blacklist

Jewish Museum Milwaukee

Bluewater Studio, in partnership with Jewish Museum Milwaukee and Crux Creative, designed and produced a new traveling exhibit, "Blacklist: The Hollywood Red Scare."

This exhibit examines the abuse of First Amendment protections under the guise of shielding Americans from Communist threat. Drawing on original film clips and documents, ephemera and dramatic congressional testimony by some of Hollywood's most noted figures, this exhibit shows how rights were ignored and the motion picture business self-censored its offerings from the public.
