

A Community Effort

Forest County Potawatomi Museum

A team led by Bluewater Studio, in partnership with the Forest County Potawatomi Community, has been developing this stunning new exhibit within a unique 12-sided, 2,700 sq. foot gallery, resulting in a highly engaging and educational visitor experience.

With installation almost complete, this exhibit features a magnificent range of physical elements, hands-on interactives, artifact cases, elegantly designed and printed wall graphics, a custom-designed epoxy floor, and multiple media experiences – including an immersive theatre space with a “Who We Are” film.

As the lead firm for this comprehensive design-build project, our work includes the planning, scheduling, project management, fabrication, and installation of the entire exhibition – including collaborating on plans for the demolition of the former exhibits and providing direction for the renovation of the gallery space.

We hope you enjoy this preview. Stay tuned for more as our team completes this project later this year!
